# *About the speaker:*

## **GWEN LIGHTER**

Gwen Lighter is the founder of The GoFly Prize, which is a challenge to develop a safe, quiet, ultra-compact, near-VTOL personal flying device capable of flying twenty miles while carrying a single person. The total prize amount is \$2,000,000.

The GoFly Prize seeks an “everyone” personal flying device, capable of being flown by ANYONE, ANYWHERE. It should be a device for ALL: young and old, city-dweller and country-dweller, expert and novice. Recent advances in propulsion, energy, light-weight materials, and control and stability systems have combined to produce a moment of achievable innovation. What can be accomplished today could not have been attained even a few years ago. Technological and scientific advances have resulted in a time when our most audacious dream—the dream of pure human flight—is now achievable.

The GoFly Prize Competition launches on September 26, 2017.
